Plan Speaking Parts for Live Demo - assign who is speaking when and about what for the live demo	Everyone
Rehearse Live Demo - practice demoing until we satisfy the content requirements and time requirement	Everyone

Minutes from Previous Meeting

- Add Names to Menu Item Cards
 - Remove names from the actual images
 - Leave white space under the image of the menu item
 - Insert text that can be independent from the image and can be translated with Google Translate API
- Navigation with Keyboard
 - Some navigation with keys was corrupted when implemented with low-vision accessibility features
 - Partially works; needs to be refined and corrected for 100% proper functionality
- Implement Google Translate API
 - Very simple implementation

- Might possibly add a specific translate button to manually select which language that is desired
- Implement Google Maps
 - Add a new item to Navigation bar
 - Assign nearby locations (College Station, Bryan, North Houston, etc.)
- Code Documentation
 - Go through all files and ensure code documentation is present and thorough
